z=50 km
Surface terrestre, temperature a 0°C
Temper. init – 100°C
Plaque superieure se deplace de gauche a droite
Flux nul
z=30 km
Flux nul
Plaque inferieure se deplace de droite a gauche
Temperature init + 100°C
z
z=0 km
Bord inferieur du domaine modelise
Temperature a la base, temperature a 1000°C
x=0 km
x=100 km
